## TÜV AUSTRIA BELGIUM NV – Data Intelligence Engineer

### What will you do?

TÜV Austria Belgium is seeking a highly skilled and motivated Data Intelligence Engineer to join our team. This role is integral to ensuring that our AI projects adhere to the highest standards of governance and best practices while delivering innovative, data-driven solutions to our clients. If you are passionate about AI development and keen to work on impactful projects, we invite you to apply.

### Key Responsibilities

- **Governance and Best Practices:** Develop and implement governance frameworks and best practices for AI development to ensure compliance, ethical standards, and quality assurance.
- **AI Project Development:** Lead and contribute to data-driven AI projects, applying advanced machine learning techniques to solve complex problems for our customers.
- **Data Management:** Oversee the collection, storage, and analysis of large datasets, ensuring data integrity and security.
- **Collaboration:** Work closely with cross-functional teams, including data scientists, engineers, and project managers, to deliver high-quality AI solutions.
- **Continuous Improvement:** Stay updated with the latest advancements in AI and machine learning, and drive continuous improvement in technologies and methodologies.
- **Client Interaction:** Engage with clients to understand their needs, present project findings, and provide technical expertise and support.

### Who are you?

- **Education:** Bachelor's or Master's degree in Computer Science, Data Science, Artificial Intelligence, or a related field.
- **Experience:** Minimum of 3-5 years of experience in AI development, data engineering, or a related role.
- **Technical Skills:** Proficiency in programming languages such as Python, R, or Java; experience with AI frameworks and libraries (e.g., TensorFlow, PyTorch); and strong understanding of data management and analysis tools.
- **Analytical Thinking:** Strong problem-solving skills and the ability to analyze complex datasets to derive actionable insights.
- **Communication:** Excellent verbal and written communication skills, with the ability to convey technical concepts to non-technical stakeholders.

- **Team Player:** Ability to work effectively in a collaborative team environment.
- **Ethical Standards:** Commitment to maintaining high ethical standards and ensuring compliance with all relevant regulations and guidelines.
- A demonstrated commitment to sustainability and quality is highly desirable.

## Why join us?

- **At the forefront of innovation:** we have developed our own innovation platform, Innovatiiv, where you can submit ideas, participate in challenges and collaborate with colleagues from over the globe to drive continuous improvements. Intrapreneurship is highly encouraged!
- **Think global, act local:** we combine global expertise with local insights to deliver solutions that are both innovative and relevant. You will be part of a global network, yet your work will directly impact the local communities and industries we serve.
- **Sustainability is deeply rooted in every aspect of our company:** Your work will help companies reduce their ecological footprint and comply with important environmental standards and regulations.
- **Our people, our most valued resource:** as a people business, our success is built on the skills, dedication and innovation of our colleagues. We invest in our team because we understand that they are our greatest assets. Your growth, safety and wellbeing are our priority.
