

A background image showing two people, a man and a woman, looking at a screen. The man is in the foreground, wearing glasses and a blue shirt, looking down. The woman is in the background, looking towards the screen. The image is slightly blurred.

## TÜV AUSTRIA BELGIUM NV – Sustainability Engineer

### What will you do?

- **ESG Strategy Development:** Assist clients in designing and implementing effective ESG (Environmental, Social, and Governance) strategies that align with their business goals.
- **Gap Analysis:** Conduct ESG gap analyses to identify areas of improvement and ensure alignment with industry standards.
- **Data Collection & Analysis:** Gather and analyze ESG-related data, providing insights to drive sustainable business practices.
- **Carbon Footprint & LCA Calculations:** Support carbon footprint calculations and Life Cycle Assessments (LCA) to help clients reduce their environmental impact.
- **Certifications:** Assist with obtaining certifications in various sustainability standards, including ISO 14064, 14067, 14068, and others.
- **Green/Low-Carbon Hydrogen Certification:** Help clients achieve certifications for green or low-carbon hydrogen projects.
- **Offsetting Projects:** Provide support in certifying carbon offsetting initiatives to ensure compliance with sustainability goals.
- **Regulatory Compliance:** Monitor emerging ESG regulations and assess their impact on both our portfolio and our clients' operations, providing strategic advice for compliance.

### Who are you?

- **Educational Background:** You hold a Bachelor's or Master's degree in Chemistry, Biochemistry, Bio-engineering, Chemical Engineering, or (Polymer) Materials Engineering.
- **Communication Skills:** You have strong verbal and written communication skills, able to articulate complex concepts clearly and collaborate effectively with team members and clients.
- **Team Player:** You thrive in a team-oriented environment, contributing to a positive and collaborative workplace culture.
- **Relevant Experience:** Ideally, you have some experience in ESG analysis, sustainability reporting, or a similar support role, gained through an internship or an analyst position (a plus, but not required).
- **Analytical Mindset:** You have excellent analytical skills and a keen attention to detail, allowing you to identify opportunities for improvement and ensure accuracy in your work.
- **Language Skills:** Fluency in English is a must, and proficiency in Dutch or French is highly valued.
- **Proactive Attitude:** You are a self-starter who takes initiative and can work independently, while still seeking support and collaboration from your team when needed.

- **Positive & Solutions-Oriented:** You approach challenges with a can-do attitude, always seeking solutions and contributing to a forward-thinking and supportive team environment.
- **At the forefront of innovation:** we have developed our own innovation platform, Innovativ, where you can submit ideas, participate in challenges and collaborate with colleagues from over the globe to drive continuous improvements. Intrapreneurship is highly encouraged!
- **Think global, act local:** we combine global expertise with local insights to deliver solutions that are both innovative and relevant. You will be part of a global network, yet your work will directly impact the local communities and industries we serve.
- **Sustainability is deeply rooted in every aspect of our company:** Your work will help companies reduce their ecological footprint and comply with important environmental standards and regulations.
- **Our people, our most valued resource:** as a people business, our success is built on the skills, dedication and innovation of our colleagues. We invest in our team because we understand that they are our greatest assets. Your growth, safety and wellbeing are our priority.
