

TÜV AUSTRIA BELGIUM NV – NDT technician

What will you do?

As an **NDT Technician (Non-Destructive Testing)**, you'll be part of a team responsible for quality and safety inspections in the industrial sector. Your projects will mainly be located in the **Liège – Namur – Waterloo region**

Field-based role

You will mainly operate in the field, using your prior NDT experience to perform inspections across diverse industrial settings. You work independently while actively contributing to knowledge sharing within the team.

Inspection techniques include:

- Ultrasonic Testing (UT)
- Radiography
- Penetrant Testing (PT) and Magnetic Particle Testing (MT)
- Visual inspections
- Advanced techniques such as Phased Array and Eddy Current

Growth and development

With proper guidance and internal training, you'll gradually expand your skill set. Together with your team lead, you'll determine which path suits you best:

- Project coordination
- Technical specialization
- Leadership roles
- Progression to Senior NDT Technician

You choose the direction; we support your development.

What we offer

A challenging and hands-on role in which you actively contribute to **quality and safety inspections** within the industrial sector, working on diverse projects across various environments.

A **supportive and collaborative work environment** with an open and respectful company culture, where teamwork, mutual support, and knowledge sharing are central.

An organization that **reinvests in its people, technology, and services**, allowing you to work with modern inspection equipment and continuously develop your technical expertise.

Compensation & benefits

A competitive salary, supplemented with an attractive benefits package, including:

- **Meal vouchers** of €8 per working day
- **Fixed expense allowance**
- **Eco vouchers** of €250 per year
- **Hospitalization insurance** (including outpatient and dental care), group insurance, and the option to cover family members
- **Year-end bonus**
- **Mobile subscription** and Bring Your Own Device allowance
- **Laptop**
- **Company car with charging card or mobility budget**
- **Flexible Income Plan**, allowing choices such as extra leave days, bicycle leasing, or telecom devices
- **Seniority leave starting from 2 years**

What do we expect from you?

Experienced professional:

- Technical expertise
- Independence and responsibility
- You have experience in NDT and hold one of the following qualifications: Ultrasonic Testing (UT) Level 1 or Level 2

Practical requirements

- You are preferably living in the Liège – Namur – Waterloo region (This region is your primary work area, though flexibility is required when needed)
- A2 diploma (or equivalent) in electronics, electromechanics, or another technical field
- Basic knowledge of Microsoft Word and Excel
- Willingness to work flexible hours (including possible weekend or shift work)
- Driver's license B
- Ability to communicate fluently in French and/or English
- No fear of heights, no claustrophobia, and no color blindness
- You know the difference between an Allen key and a Torx key
